²Optional for Basic units, standard on Full Load units

Operational Options & Features

Conversion Kit

Convert to propane in minutes with our simple drop in burner system

Framing Depth

Both The DelRay 36" and 48" fit easily into a 1 1/4" framing depth

Venting Kits

Everything to complete your direct venting system in one kit. Comes complete with termination, wall thimble and flex pipe

FROM MINIMALIST TO INDULGENCE

Fan System[†]

A quiet dual blower system turns the DelRay into an efficient room heater.

Full Function Remote[‡]

Full control at your fingertips, from the accent lights and fans or simply turning on the burner.

True Flush Face Design

Finishing 1ST Place

We consulted tile setters and masons in order to make the DelRay the easiest fireplace in the industry to create a sharp and clean edge.

Trim kits

For uneven and ledgestone finishing, we developed a slim finishing kit that fits directly to the fireplace frame to conceal the finished edge.

These kits are adjustable and can cover finishing depths up to 1.5"

MONTIGO DELRAY FINISHING KIT

Visual Options & Features

Invisimesh Screen

A microwoven steel mesh leaves practically nothing between you and the fire.

Media Downlighting

Enhancing your choice of media even when the unit is off.

Reflective Black Glass

For a sharper and deeper view that fills the DelRay with flames.

Our Guarantee

Montigo™ stands by the craftsmanship and durability of our products by providing a 15 year warranty on the burner and firebox in all our residential fireplaces.

1976: The Days Before Gas Fireplaces

In 1976, president and founder, Dan Binzer started installing zero-clearance wood burning fireplaces with local builders in Vancouver, BC. Over the years, demand grew for a gas alternative, so Dan engineered and manufactured the first ever Sandpan Logset. The logset was installed in the zero-clearance wood burning fireplace shell, resulting in one of the first zero-clearance gas fireplaces on the market.

1985: Gas Fireplace Manufacturing Begins

Demand for gas grew rapidly, especially among multi-unit developments and Dan Binzer started a company called Canadian Heating that would offer full service design, engineering and manufacturing for gas fireplaces. Under the Montigo brand, Canadian Heating began manufacturing and selling a wide selection of zero-clearance gas fireplaces throughout Canada and in 1985, development began for the latest and greatest in gas fireplace technology – Direct Venting.

1994: Manufacturing Excellence is Achieved

Development and advancement of the gas fireplace continued over the years with continual developments to improve the efficiency of the fireplaces and perfected manufacturing processes to deliver an optimum fireplace each and every time – even for completely custom units.

Present: Leading the Way with Modern Fireplace Design

As one of the first to bring to market a linear designed fireplace, Montigo now offers the largest selection of linear fireplaces demanded by designers, architects and homeowners wanting to create a modern and contemporary space.

WARNING

Some materials used in the manufacturing process of this product can expose you to Benzene which is known in the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65warnings.ca.gov
